FULL PRESS RELEASE EMBARGOED UNTIL 06/04 @ 9 a.m. ET

SK hynix & NEOWIZ Collaborate on Limited Edition *Lies of P* T31 Solid State Drive Launching Globally in July

New Limited Edition SSD features Lies of P artwork in two varieties and is compatible with Console and PCs

SEOUL (June 4, 2024) - Today NEOWIZ, the publisher of hit action-adventure game *Lies of P*, and SK hynix, one of the world's leading computer hardware manufacturers, announced a collaboration for a Limited Edition *Lies of P* T31 Solid State Drive (SSD), set to be available this summer.

The Tube T31 from SK hynix, first released earlier this year in March, is a stick-type SSD that can be used without a cable. The Tube T31 *Lies of P* Limited Edition SSD comes in two varieties with two distinct artwork featuring the iconic Legion Arm from Neowiz's hit souls-like game. Both drives are fully compatible with PC and Console, allowing players to keep extra storage and transfer between systems (PlayStation 5/4, Xbox Series X|S, Xbox One, Windows, and macOS). The T31 also received a Global Product Design award at the 2024 Red Dot Awards.

The Tube T31 *Lies of P* Edition will be officially unveiled at a private booth jointly operated by SK hynix and Hitachi-LG Data Storage, Inc. (SK hynix's global sales and manufacturing partner for SSDs) at Computex, held in Taiwan from June 4 to June 7. It will be available in limited quantities globally starting in July.

--

About *Lies of P*

Lies of P is a single-player action RPG in the Souls-like genre, set in the late 19th-century Belle Époque era, released by NEOWIZ in September 2023. It features highly detailed character and background depictions based on realistic graphics, a unique world adapted from the classic Italian tale 'Pinocchio' into a dark fairy tale, and excellent action elements.

About Tube T31

The Tube T31 from SK hynix is a stick-type SSD that can be used without a cable by directly plugging it into USB-A ports. It supports various devices, including consoles like PS4, PS5, and Xbox, as well as PCs,

laptops, and TVs running Windows and macOS. The device supports up to 10Gbps transfer speeds with the USB 3.2 Gen 2 interface and features an ultra-lightweight, ultra-compact design weighing just 34 grams.
