

All Treats, No Tricks! *Cats & Soup* Launches a Claw-some Halloween Update Featuring Forest Expansion and Theme Renewals

Enjoy a new Spooky Forest theme with new items, costumes, rewards and adventure minigame, as well as an entirely new area for more cat facilities and quality of life updates

SOUTH KOREA – October 23, 2025 – NEOWIZ celebrates the fang-tastic season with a Halloween update for its mobile idle game, *Cats & Soup*. Starting on Thursday, Oct. 23, the Halloween update introduces Spooky Forest, the first installment from the new line of renewed themes.

The Spooky Forest theme allows players to collect bats and exchange them for exclusive costumes at the Spooky Forest store. Each renewed theme features special effects, exclusive NPCs and easter eggs for a more engaging gameplay experience.

Until Monday, Nov. 3, *Cats & Soup* will showcase an entirely new look based on the Spooky Pumpkin House and Mystery Hotel concepts. The Workshop on Wheels will feature new items, including four types of costumes, 15 types of furniture, and two types of lamps based on the Spooky Forest and the Mystery Hotel. Furr-thermore, all

players who participate in the week-long Mystery Hotel login event will receive the Bellboy Uniform costume for both cats and Baby Kitty, available until Thursday, Nov. 6.

The meow-gical fun continues with a new adventure minigame with casual gameplay, Ingredients Order! Avid collectors will be eager to find a delightful array of new rewards and items for Enchanting Fairy Tale Star Season 2, as well as fantasy-inspired items based on The Cat Piper.

As a response to player feedback, *Cats & Soup* is renewing the game's forest with the introduction of a new area separate from the original forest. A connecting passage will allow cats to move between the two maps and provide space for more facilities. The update also addresses various quality of life changes, including an auto-save function and support for screenshots in landscape mode. The new Optimization Mode allows players to automatically adjust their graphics settings based on their system specifications.
