

DICE THRONE DIGITAL BRINGS MIXED REALITY TABLETOP BATTLES TO META VR GLASSES ON DAY ONE

Launching in Spring 2027, the award-winning tabletop battle game lets players roll dice by hand and command iconic Heroes in mixed reality, turning any surface into a virtual tabletop

SPOKANE, Wash. – September 23, 2026 – *Dice Throne* and Nerd Ninjas today announced that ***Dice Throne Digital*** will be available as a day-one title for **Meta VR Glasses**, bringing the award-winning tabletop battle game into mixed reality with intuitive hand tracking, larger-than-life Hero battles and shared virtual tabletops that connect players anywhere in the world. The game will also be available on Meta Quest 3/3S, mobile (iOS, Android) and PC (Steam, Steam Deck).

[**\[View the Mixed Reality Gameplay Trailer Here\]**](#)

On **Meta Quest 3/3S** and **Meta VR Glasses**, ***Dice Throne Digital*** leaps from the physical tabletop and enters immersive mixed reality. A dining table, computer desk or nearly any surface can become a virtual tabletop where players can satisfyingly roll dice with their hands, watch spectacular attacks unfold around them, hear every blow and ability land, and see Heroes brought to life in an entirely new way.

Players no longer need to be in the same room to gather around the same virtual table. Friends can face off from wherever they are, combining the feeling of sitting across from an opponent with the flexibility of online play.

“At the heart of *Dice Throne* is the idea of ‘Become Your Hero,’ and in mixed reality, you can take that literally,” said Nate Chatellier, co-designer of *Dice Throne* and CEO of Nerd Ninjas. “Your hands become part of the digital experience, the Heroes come to life around you, and suddenly the world of *Dice Throne* feels bigger and more immersive. You can sit across the same virtual table from a friend who’s hundreds of miles away and still feel like you’re playing together. That’s what makes mixed reality so exciting for us. We’re not trying to replace the tabletop experience. We’re asking how we can use digital to do something the physical game never could, while still staying true to what makes *Dice Throne* feel like *Dice Throne*.”

More about *Dice Throne Digital*

For almost a decade, the award-winning game *Dice Throne* has brought fast-paced, head-to-head battles to tabletops around the world. Now, after years of fan requests, the fight for the throne is going digital.

In *Dice Throne Digital*, players choose from a roster of distinct Heroes, each with unique abilities and play styles. Every Hero rolls a customized set of dice to unleash powerful abilities, while drawn cards can manipulate rolls, counter an opponent’s moves and create the perfect opening for an attack. Luck may shape the roll, but timing and strategy are just as crucial to claiming victory, whether jumping into a Classic 1v1 duel or tackling the solo roguelite Campaign mode.

Dice Throne Digital will launch with the original roster of eight iconic Heroes: **Barbarian, Monk, Moon Elf, Ninja, Paladin, Pyromancer, Shadow Thief and Treant**. Each features unique dice, abilities and gameplay strategies ranging from aggressive offense to tactical defense.

Players can experience the game through **Classic mode**, a faithful recreation of the one-on-one battles fans love, or explore the roguelite **Campaign mode**. Inspired by [*Dice Throne Adventures*](#) and *Slay the Spire*, each Campaign presents branching paths, challenging enemies and unique upgrades. Completing runs unlocks rewards and cosmetics that players can show off in Classic mode battles, while leveled-up Heroes can be taken into head-to-head combat in **Unlimited mode**.

Coming in **early 2027**, *Dice Throne Digital* will be free-to-play across **Meta Quest, mobile and PC**, with seamless cross-platform play and cross-progression allowing players to battle friends across supported devices and carry their progress with them wherever they choose to play.

The digital adaptation follows a successful Kickstarter campaign in April 2026, where **9,574 backers pledged \$686,431** to help bring the project to life.
